PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in Python, Django, and backend development, specializing in REST APIs and scalable web applications. Proficient in Django REST Framework, Celery, Redis, JWT, and OTP authentication. Experienced in building production-ready applications and AI-powered solutions with clean architecture and maintainable code.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework (DRF), FastAPI, REST APIs

Generative AI: Prompt Engineering, LangChain, Gemini API, AI Agents, AI Chatbot Integration, Retrieval-Augmented Generation (RAG), LLM Applications

Frontend: HTML5, CSS3, Bootstrap, JavaScript (ES6)

Databases: PostgreSQL, MySQL, SQLite

Tools & Platforms: Git, GitHub, Postman, Render, Netlify, Linux

EDUCATION

Master of Computer Applications (MCA) – LNCT, Bhopal | CGPA: 7.6

Bachelor of Computer Applications (BCA) – International School of Management, Patna | CGPA: 7.86

Intermediate – College of Commerce, Arts & Science, Patna (2021) | 67.6%

Matriculation – New Era Public School, Patna (2019) | 71.8%

PROJECTS

CodeClarity – AI-Powered Debugging Assistant | [Live Demo](#)

Tech: FastAPI, Groq LLM, Python, Bootstrap, JavaScript, Render, Netlify

- Developed LLM-driven workflows for bug detection, code explanation, corrected code generation, and complexity analysis.
- Implemented frontend-backend API integration with structured response handling and syntax-highlighted code rendering.
- Deployed scalable APIs and responsive web interfaces using Render and Netlify.

DocumentVault – Secure Document Management System | [Live Demo](#)

Tech: Django, Django REST Framework, Celery, Redis, MySQL, Bootstrap

- Built a secure document management system with JWT and OTP-based authentication.
- Implemented UUID-based file handling and automated document expiry reminders using Celery background workers.
- Added privacy features including Download My Data and Request Account Deletion.

ACHIEVEMENTS

- Runner-up at Amity Techphilia 6.0 (Web Technology).
- **Finalist, HACKSAGON 2025** – National Level Software & Hardware Hackathon organized by ABV-IIITM, IEEE EPS, AESS Society, and IEEE MP Section.
- Deployed 2 full-stack Django projects on Render and Netlify.
- Demonstrated consistent learning and adaptability through self-driven projects.
