PROFESSIONAL SUMMARY

Motivated MCA fresher (2026) passionate about Python, Django, FastAPI, and Generative AI. Built and deployed two full-stack projects covering REST APIs, background tasks, and LLM integration through self-driven learning. Maintains an active GitHub profile with multiple Python and Django repositories. Selected in TCS Ninja Off-Campus drive. Achieved national recognition at HACKSAGON 2025 and Runner-Up at Amity Techphilia 6.0. Strong foundation in DSA, OOP, DBMS, and backend development. Looking for an entry-level Software Engineer or Python/Backend Developer role to contribute, grow, and deliver real impact.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Django REST Framework (DRF), FastAPI, REST APIs, LangChain, JavaScript (ES6), HTML5, CSS3, Bootstrap

Generative AI: Prompt Engineering, LLM Integration, Retrieval-Augmented Generation (RAG), AI Agents, AI Chatbot Development, Groq LLM, Gemini API, OpenAI API

Databases & Tools: PostgreSQL, MySQL, SQLite, Celery, Redis, JWT, OTP Authentication, UUID, Git, GitHub, Postman, Render, Netlify, Linux

Core CS Subjects: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems (OS), Database Management Systems (DBMS), Computer Networks, Software Engineering, System Design Basics

PROJECTS

CodeClarity – AI-Powered Debugging Assistant | Live Demo: <https://codeclarityai.netlify.app/>

Tech Stack: FastAPI, Groq LLM, LangChain, Python, Bootstrap, JavaScript, Render, Netlify

- Developed an AI-powered debugging assistant using FastAPI and Groq LLM capable of detecting syntax and logical errors across 2+ programming languages, generating optimized code fixes, and providing Big-O complexity analysis.
- Connected the frontend and backend through clean REST API calls with syntax-highlighted code display, reducing code review time for developers.
- Deployed the backend on Render and the frontend on Netlify so the app is live, publicly accessible, and handles real user requests.

DocumentVault – Secure Document Management System | Live Demo: <https://document-vault-ghi6.onrender.com/>

Tech Stack: Django, Django REST Framework, Celery, Redis, JWT, OTP, MySQL, Bootstrap

- Developed a secure document management platform using Django REST Framework with JWT authentication and OTP verification, supporting user privacy controls including Download My Data and Account Deletion.
- Implemented automated document expiry notifications using Celery and Redis background tasks, eliminating the need for manual follow-up entirely.
- Deployed full-stack application on Render with a responsive Bootstrap frontend, making the system accessible and usable across all devices.

EDUCATION

Master of Computer Applications (MCA) 2024 - 2026

LNCT, Bhopal, Madhya Pradesh | **CGPA: 7.6/10**

Bachelor of Computer Applications (BCA) 2021 - 2024

International School of Management, Patna, Bihar | **CGPA: 7.86/10**

ACHIEVEMENTS & CERTIFICATIONS

- National Finalist, HACKSAGON 2025 – Selected as a finalist at the national-level Software & Hardware Hackathon organized by ABV-IIITM, IEEE EPS, AESS Society, and IEEE MP Section.
- Runner-Up, Amity Techphilia 6.0 – Won 2nd place in the Web Technology track at a competitive inter-university technical fest.
- TCS Ninja – Offer Letter secured through Off-Campus placement drive at Tata Consultancy Services, selected among thousands of candidates nationwide.
- Active GitHub contributor with multiple Python, Django, and FastAPI repositories — github.com/sankalpkumar111
- Python Programming Certificate – Udemy (verified online credential demonstrating core Python proficiency).
- TEDx LNCT Bhopal – Participant; engaged with global ideas in technology and innovation.
